

## **Master of Philosophy (MPhil) and Doctor of Philosophy (PhD) Programs in Life Science**

### *Curriculum for Master of Philosophy (MPhil) Program in Life Science*

The Master of Philosophy (MPhil) program enables students to acquire the experience and knowledge required for research on life science projects. While an original contribution to life science knowledge is not a prerequisite to the completion of the MPhil degree, the attainment of scientific competence is important. The aim of the MPhil program is to train qualified postgraduate students who can conduct supervised research in life science. Students with a first degree in an area not directly related to life science may be required to take additional courses.

To fulfill the degree requirements, students are expected to attend seminars organized in each regular term and present seminars as required, undertake coursework, and conduct thesis research. In the final stage of the program, students are required to submit a thesis to the Division of Life Science and, subsequently, to present and defend it.

Specific program requirements are:

- 6 credits of coursework from the following course list, of which no more than 3 credits of 4000-level courses:

LIFS 4060	Immunology
LIFS 4090	Developmental Biology
LIFS 4140	Tumor Biology
LIFS 4150	Plant Biotechnology
LIFS 4170	Advanced Molecular Genetics
LIFS 4190	Advanced Cell Biology
LIFS 4360	Aquaculture Biotechnology
LIFS 4380	Pharmacology and Toxicology
LIFS 4540	Structure and Function of Proteins
LIFS 4550	Biochemistry of Nutrition
LIFS 4580	Bioinformatics
LIFS 4620	Advanced Biological Chemistry
LIFS 4630	Advanced Topics in Biotechnology
LIFS 4760	Biochemistry of Diseases
LIFS 4950	Neurochemistry
LIFS 5070	Workshops in Biosciences
LIFS 5120	Advanced Topics in Biophysical Chemistry
LIFS 5240	Molecular and Developmental Neurobiology
LIFS 5260	Biochemical and Molecular Basis of Diseases
LIFS 5300	Conservation Biology
LIFS 5380	Cell Cycle Control
LIFS 5320	Ecotoxicology
LIFS 5710	Cellular Regulation
LIFS 6130	Scientific Writing in Biology
LIFS 6170	Special Topics in Molecular, Cell and Developmental Biology

LIFS 6210	Special Topics in Marine Biology
LIFS 6270	Advanced Topics in Biochemistry
LIFS 6660	Molecular Medicine

Plus:

- Taking LANG 5010 Postgraduate English for Science Studies (1 credit) in the first year of study;
- Continuous registration in LIFS 6110 Life Science Seminar I <sup>1</sup>;
- Continuous registration in LIFS 6120 Life Science Seminar II <sup>1</sup>;
- Taking and passing LIFS 6410 Independent Study throughout the residency;
- Registration in LIFS 6990 MPhil Thesis Research; and
- Presentation and oral defense of the MPhil thesis.

No credit transfer will be allowed.

#### Molecular Medicine Concentration

For students who opt for the Molecular Medicine concentration, specific program requirements are:

- 6 credits of coursework from the following course list, of which no more than 3 credits of 4000-level courses:

LIFS 4060	Immunology
LIFS 4090	Developmental Biology
LIFS 4140	Tumor Biology
LIFS 4150	Plant Biotechnology
LIFS 4170	Advanced Molecular Genetics
LIFS 4190	Advanced Cell Biology
LIFS 4360	Aquaculture Biotechnology
LIFS 4380	Pharmacology and Toxicology
LIFS 4540	Structure and Function of Proteins
LIFS 4550	Biochemistry of Nutrition
LIFS 4580	Bioinformatics
LIFS 4620	Advanced Biological Chemistry
LIFS 4630	Advanced Topics in Biotechnology
LIFS 4760	Biochemistry of Diseases
LIFS 4950	Neurochemistry
LIFS 5070	Workshops in Biosciences
LIFS 5120	Advanced Topics in Biophysical Chemistry
LIFS 5240	Molecular and Developmental Neurobiology

---

*Note: 1. Students with research focus in Marine and Environmental Science may take ENV5 6011 Postgraduate Seminar to substitute LIFS 6110 and LIFS 6120.*

LIFS 5300	Conservation Biology
LIFS 5320	Ecotoxicology
LIFS 5380	Cell Cycle Control
LIFS 5710	Cellular Regulation
LIFS 6130	Scientific Writing in Biology
LIFS 6170	Special Topics in Molecular, Cell and Developmental Biology
LIFS 6210	Special Topics in Marine Biology
LIFS 6270	Advanced Topics in Biochemistry

Plus:

- Taking LANG 5010 Postgraduate English for Science Studies (1 credit) in the first year of study;
- LIFS 5260 Biochemical and Molecular Basis of Diseases;
- LIFS 6660 Molecular Medicine;
- Continuous registration in LIFS 6110 Life Science Seminar I <sup>1</sup>;
- Continuous registration in LIFS 6120 Life Science Seminar II <sup>1</sup>;
- Taking and passing LIFS 6410 Independent Study throughout the residency;
- Registration in LIFS 6990 MPhil Thesis Research;
- Conduct research in the area of molecular medicine; and
- Presentation and oral defense of the MPhil thesis.

### ***Curriculum for Doctor of Philosophy (PhD) Program in Life Science***

The Doctor of Philosophy (PhD) program aims to prepare students through completion of a research project, to become independent scientists capable of the design, initiation and execution of original research. This program will train students to prepare and publish their main findings in peer-reviewed international journals and are ready to independently conduct advanced-level research projects by the time of their graduation. Students with a first degree in an area not directly related to life science may be required to take additional courses.

To fulfill the degree requirements, students are expected to attend seminars organized in each regular term and present seminars as required, undertake coursework, and conduct thesis research. Students are also required to pass a qualifying examination set by the Division of Life Science. In the final stage of the program, students are required to submit a thesis and, subsequently, to present and defend it.

---

*Note: 1. Students with research focus in Marine and Environmental Science may take ENVS 6011 Postgraduate Seminar to substitute LIFS 6110 and LIFS 6120.*

Specific program requirements are:

- 9 credits of coursework from the following course list, of which no more than 3 credits of 4000-level courses:

LIFS 4060	Immunology
LIFS 4090	Developmental Biology
LIFS 4140	Tumor Biology
LIFS 4150	Plant Biotechnology
LIFS 4170	Advanced Molecular Genetics
LIFS 4190	Advanced Cell Biology
LIFS 4360	Aquaculture Biotechnology
LIFS 4380	Pharmacology and Toxicology
LIFS 4540	Structure and Function of Proteins
LIFS 4550	Biochemistry of Nutrition
LIFS 4580	Bioinformatics
LIFS 4620	Advanced Biological Chemistry
LIFS 4630	Advanced Topics in Biotechnology
LIFS 4760	Biochemistry of Diseases
LIFS 4950	Neurochemistry
LIFS 5070	Workshops in Biosciences
LIFS 5120	Advanced Topics in Biophysical Chemistry
LIFS 5240	Molecular and Development Neurobiology
LIFS 5260	Biochemical and Molecular Basis of Diseases
LIFS 5300	Conservation Biology
LIFS 5320	Ecotoxicology
LIFS 5380	Cell Cycle Control
LIFS 5710	Cellular Regulation
LIFS 6130	Scientific Writing in Biology
LIFS 6170	Special Topics in Molecular, Cell and Developmental Biology
LIFS 6210	Special Topics in Marine Biology
LIFS 6270	Advanced Topics in Biochemistry
LIFS 6660	Molecular Medicine

Plus:

- Taking LANG 5010 Postgraduate English for Science Studies (1 credit) in the first year of study;
- Continuous registration in LIFS 6110 Life Science Seminar I <sup>1</sup>;
- Continuous registration in LIFS 6120 Life Science Seminar II <sup>1</sup>;
- Taking and passing LIFS 6410 Independent Study throughout the residency;
- Comprehensive qualifying examination;

---

*Note: 1. Students with research focus in Marine and Environmental Science may take ENVS 6011 Postgraduate Seminar to substitute LIFS 6110 and LIFS 6120.*

- Registration in LIFS 7990 Doctoral Thesis Research; and
- Presentation and oral defense of the PhD thesis.

#### Molecular Medicine Concentration

For students who opt for the Molecular Medicine concentration, specific program requirements are:

- 9 credits of coursework from the following course list, of which no more than 3 credits of 4000-level courses:

LIFS 4060	Immunology
LIFS 4090	Developmental Biology
LIFS 4140	Tumor Biology
LIFS 4150	Plant Biotechnology
LIFS 4170	Advanced Molecular Genetics
